$18K GMV in One Month. *From a Creator We Had Never Worked With.*

We went looking for a net-new creator to put on retainer for a baby and family brand on TikTok Shop US. One month in, she had driven $18K in GMV at an 18.80x ROAS.

VERIFIED TIKTOK SHOP PARTNER

18.80x	$18K	30 days
ROAS	GMV IN 1 MONTH	TO PROVE THE RETAINER

01 Setup

A baby and family brand selling on TikTok Shop US. The affiliate lead had a clear question: who is the next creator worth putting on retainer? Not someone already in the rotation. Someone new to us, with no history with the brand.

02 Problem

Every affiliate program hits the same ceiling. The creators who already work are already working. Re-briefing them produces more of the same, and the roster stops growing. The constraint was not budget or product. It was supply. We needed a creator with no prior relationship to the brand, and we needed to find out fast whether a retainer would pay back.

> **Operator note —** The $18K is GMV, not profit. We report it that way on purpose. Revenue-first means we tell you which number we are quoting.

03 The Net-New Retainer Creator

The Net-New Retainer Creator is simple. Instead of squeezing a roster we already know, we source one creator from outside it and lock her in on a retainer. A retainer changes the economics. The creator is paid for a committed relationship, not a one-off post, and the brand gets repeatable

content from someone who learns the product over time. The test is whether the first month of GMV justifies the commitment.

04 The moves

Source

The affiliate lead went out and found a brand new creator, one the team had not worked with before. No warm intro. No prior sales history with this brand.

Negotiate

We negotiated the retainer directly and secured the deal. The terms made the relationship a commitment on both sides, not a single post.

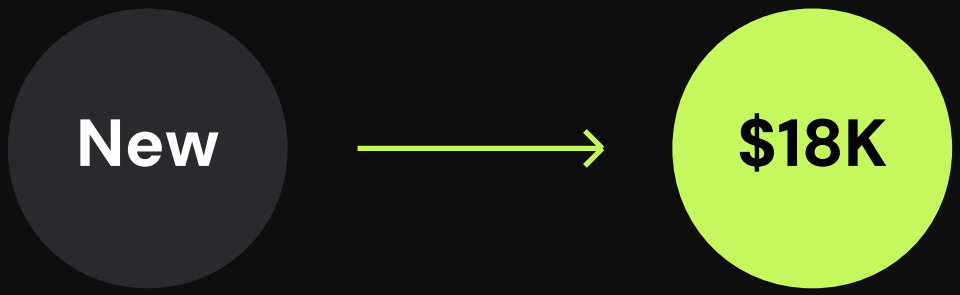

Retain

After the first month, the team kept her on for the brand. The same relationship can also support other accounts as we build it out.

05 Result

In one month on retainer, the net-new creator generated $18K in GMV at an 18.80x ROAS (ROI 18.79, as reported). Her results are for a 30-day window. We are not stretching them into a longer run rate.

WHERE WE STARTED VS. ONE MONTH IN

BEFORE · NO PRIOR RELATIONSHIP

Net-new creator, no history with the brand

AFTER · 30 DAYS, GMV

18.80x ROAS on the retainer creator

A net-new creator with no prior relationship to the brand, and the GMV she drove in her first month on retainer. The $18K is GMV, not profit.

$18K	18.80x	30 days
GMV IN 1 MONTH	ROAS ON THE RETAINER CREATOR	FROM NET-NEW TO PROVEN

The client's response said as much as the numbers did: "No need to come to me to approve retainer budget, proceed as you see fit." When a brand hands over retainer decisions, the program has earned trust. That is the compounding part of the system.

06 Operator takeaway

If your TikTok Shop program has plateaued, look at who is not on the roster. Source one creator from outside it. Put her on a retainer with a clear 30-day read on GMV and ROAS. Keep the claim honest: one creator, one month, one brand. It is a repeatable move, not a guarantee.
