# Zero Lives Ever Run. *\$600+ in Live GMV in Two Weeks.*

A health brand had never gone Live on its own TikTok Shop channel. We rented the hosting instead of building it — \$600+ in Live GMV at \$170+ per hour, inside two weeks.

• VERIFIED TIKTOK SHOP PARTNER

**\$0 → \$600+**

BRAND-CHANNEL LIVE GMV

**\$170+/hr**

LIVE GMV PER HOUR

**2 weeks**

ZERO TO FIRST RESULT

## 01 Setup

A health brand on TikTok Shop had every lane running except one. Listings, affiliate content, in-feed — all live. Live shopping on its own brand channel: never once. Zero sessions, zero hours, \$0 in Live GMV. Not a strategic decision, just a lane the brand had never opened.

## 02 Problem

Live is the hardest TikTok Shop channel to start cold. It needs someone who can hold a camera for an hour, know the catalog, and sell without a script. Most brands stall right here — they assume Live means hiring, training, and standing up an in-house studio team before the first session ever airs. That is a hiring project wearing a channel test's clothes: months of cost before you learn whether the channel works at all. This brand had the same blocker. No host, no proof the channel would convert, and no reason to fund a team on faith.

**Operator note** — Treat Live as retail floor time, not content. The question is not "can we make videos" — it is "who staffs the floor, and what does an hour of that floor earn?"

## 03 The Outside-Host Live Launch

The Outside-Host Live Launch inverts the sequence. Instead of building the hosting capability first and testing the channel second, you rent the capability and test the channel immediately.

Outside hosts go live on the brand's own channel — so the GMV, the followers, and the session history all accrue to the brand, while the talent risk sits outside it. You find out what an hour of Live is worth before you commit a single salary to it.

## 04 The moves

### Host

We onboarded outside live hosts rather than waiting on the brand's own team to build the skill. That removed the single biggest blocker to a first session — talent availability — and got the channel live in days instead of a hiring cycle.

### Channel

The Lives ran on the brand's own channel, not a creator's. Every session, every follower, and every dollar of GMV compounded into an asset the brand keeps, even though the host was external. Rented talent, owned inventory of attention.

## 05 Result

The brand channel went from \$0 in Live GMV to \$600+ in two weeks. More useful than the total is the rate: \$170+ in Live GMV per hour of content. That is the number that decides whether the channel scales, because hours are the unit you actually buy.

### BRAND-CHANNEL LIVE GMV, BEFORE VS AFTER

BEFORE · Live GMV, brand channel

Zero Lives ever run

AFTER · Live GMV, 2 weeks

\$170+ GMV per Live hour

Two-week window. First Lives ever run on this brand channel.

**\$0**

LIVE GMV BEFORE

**\$600+**

LIVE GMV, 2 WEEKS

**\$170+**

LIVE GMV PER HOUR

**2 wks**

TIME TO FIRST READ

Two weeks is not a scaled program — it is a read. But it is a real one, taken on the brand's own channel, with no internal headcount added. Live has moved from an unproven idea to a priority lane the client wants to push, and the per-hour rate gives a straight line to the scaling decision: add hours, and see whether \$170+ holds.

You do not need to be able to host to find out whether Live works for you. Most brands sequence it backwards — hire, train, build a studio, then discover the channel's economics. Rent the hosting, run it on your own channel, and measure GMV per Live hour. That one number tells you whether to fund a team, and it costs a fortnight instead of a quarter to get it. Treat TikTok Shop as retail, not social: floor hours have a yield, and you should know yours before you sign the lease.
